Requirement Specification

REQ-0007 — Network Behavior — Bluetooth Reconnection

1. Identification

Requirement ID	REQ-0007
Title	Network Behavior — Bluetooth Reconnection
Type	Reliability
Priority	Critical
Severity	Minor
Status	Draft
Version	v3.0
Created	2023-04-27
Updated	2024-03-28
Source Document	SRS-APP-001-v3.pdf

2. Application & Solution

Application ID	APP-001
Application	SmartHome
Domain	IoT
App Version	6.0.0
Solution ID	SOL-014
Solution	Browser Engine
Component	Configuration Service
Feature	AR scene rendering

3. Requirement Description

The system shall handle media streaming within 200ms under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Browser Engine (SOL-014) being operational and at version 5.1 or above.
