Requirement Specification

REQ-0028 — Battery — Crash Reporting

1. Identification

Requirement ID	REQ-0028
Title	Battery — Crash Reporting
Type	Authentication
Priority	High
Severity	Minor
Status	Approved
Version	v1.1
Created	2022-02-23
Updated	2023-05-10
Source Document	SRS-APP-003-v4.pdf

2. Application & Solution

Application ID	APP-003
Application	GalaxySearch
Domain	Search
App Version	5.0.0
Solution ID	SOL-004
Solution	Push Notification Service
Component	UI Layer
Feature	background sync

3. Requirement Description

The system shall support health metric upload within 200ms under degraded-network conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Push Notification Service (SOL-004) being operational and at version 5.2 or above.
