Requirement Specification

REQ-0031 — Recovery — Session Token Refresh

1. Identification

Requirement ID	REQ-0031
Title	Recovery — Session Token Refresh
Type	Network Behavior
Priority	High
Severity	Trivial
Status	Approved
Version	v2.1
Created	2022-12-14
Updated	2024-04-09
Source Document	SRS-APP-008-v4.pdf

2. Application & Solution

Application ID	APP-008
Application	VoiceAssistant
Domain	AI
App Version	4.2.1
Solution ID	SOL-017
Solution	Wake Word Detector
Component	UI Layer
Feature	session token refresh

3. Requirement Description

The system shall support parental controls within 200ms under stress-test conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Wake Word Detector (SOL-017) being operational and at version 1.4 or above.
