Requirement Specification

REQ-0033 — Usability — Dark Mode

1. Identification

Requirement ID	REQ-0033
Title	Usability — Dark Mode
Type	Data Synchronization
Priority	Critical
Severity	Minor
Status	Approved
Version	v3.2
Created	2022-04-17
Updated	2023-08-06
Source Document	SRS-APP-009-v2.pdf

2. Application & Solution

Application ID	APP-009
Application	DeviceHub
Domain	IoT
App Version	4.2.5
Solution ID	SOL-018
Solution	Device Registry
Component	Firmware Manager
Feature	dark mode

3. Requirement Description

The system shall support session token refresh securely under standard conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Device Registry (SOL-018) being operational and at version 1.4 or above.
