Requirement Specification

REQ-0096 — Recovery — Bluetooth Reconnection

1. Identification

Requirement ID	REQ-0096
Title	Recovery — Bluetooth Reconnection
Type	Compatibility
Priority	High
Severity	Major
Status	Approved
Version	v2.2
Created	2022-03-04
Updated	2023-06-29
Source Document	SRS-APP-004-v4.pdf

2. Application & Solution

Application ID	APP-004
Application	DigitalWallet
Domain	FinTech
App Version	4.4.9
Solution ID	SOL-024
Solution	Cloud Storage Connector
Component	Firmware Manager
Feature	playlist shuffle

3. Requirement Description

The system shall handle secure key rotation securely under high-load conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Cloud Storage Connector (SOL-024) being operational and at version 1.8 or above.
