Requirement Specification

REQ-0204 — Usability — Payment Processing

1. Identification

Requirement ID	REQ-0204
Title	Usability — Payment Processing
Type	Authentication
Priority	Low
Severity	Trivial
Status	Deprecated
Version	v3.4
Created	2022-05-18
Updated	2024-05-25
Source Document	SRS-APP-004-v1.pdf

2. Application & Solution

Application ID	APP-004
Application	DigitalWallet
Domain	FinTech
App Version	4.4.9
Solution ID	SOL-023
Solution	Configuration Manager
Component	Network Stack
Feature	background sync

3. Requirement Description

The system shall provide user authentication consistently under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Configuration Manager (SOL-023) being operational and at version 2.9 or above.
