Requirement Specification

REQ-0221 — Error Handling — Biometric Verification

1. Identification

Requirement ID	REQ-0221
Title	Error Handling — Biometric Verification
Type	Compatibility
Priority	Critical
Severity	Major
Status	Approved
Version	v3.4
Created	2022-12-05
Updated	2024-01-01
Source Document	SRS-APP-001-v2.pdf

2. Application & Solution

Application ID	APP-001
Application	SmartHome
Domain	IoT
App Version	6.0.0
Solution ID	SOL-025
Solution	Security Vault
Component	Notification Handler
Feature	dark mode

3. Requirement Description

The system shall handle data synchronization securely under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Security Vault (SOL-025) being operational and at version 5.2 or above.
