Requirement Specification

REQ-0226 — Data Synchronization — Parental Controls

1. Identification

Requirement ID	REQ-0226
Title	Data Synchronization — Parental Controls
Type	Security
Priority	Low
Severity	Major
Status	Deprecated
Version	v1.4
Created	2022-05-30
Updated	2024-05-10
Source Document	SRS-APP-011-v3.pdf

2. Application & Solution

Application ID	APP-011
Application	ConnectedDevices
Domain	IoT
App Version	4.4.4
Solution ID	SOL-008
Solution	Recommendation Engine
Component	Notification Handler
Feature	user authentication

3. Requirement Description

The system shall handle dark mode without data loss under stress-test conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Recommendation Engine (SOL-008) being operational and at version 5.5 or above.
