Requirement Specification

REQ-0239 — Network Behavior — Dark Mode

1. Identification

Requirement ID	REQ-0239
Title	Network Behavior — Dark Mode
Type	Authentication
Priority	Critical
Severity	Major
Status	Approved
Version	v2.4
Created	2022-04-01
Updated	2023-03-07
Source Document	SRS-APP-009-v3.pdf

2. Application & Solution

Application ID	APP-009
Application	DeviceHub
Domain	IoT
App Version	4.2.5
Solution ID	SOL-020
Solution	Playlist Manager
Component	Rendering Engine
Feature	search query execution

3. Requirement Description

The system shall support AR scene rendering reliably under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Playlist Manager (SOL-020) being operational and at version 2.5 or above.
