Requirement Specification

REQ-0285 — Usability — Voice Command Recognition

1. Identification

Requirement ID	REQ-0285
Title	Usability — Voice Command Recognition
Type	Authentication
Priority	Medium
Severity	Major
Status	Approved
Version	v2.4
Created	2022-05-30
Updated	2024-03-27
Source Document	SRS-APP-007-v1.pdf

2. Application & Solution

Application ID	APP-007
Application	InternetBrowser
Domain	Web
App Version	6.3.5
Solution ID	SOL-012
Solution	AR Renderer
Component	Notification Handler
Feature	audit logging

3. Requirement Description

The system shall validate push notification delivery consistently under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the AR Renderer (SOL-012) being operational and at version 2.8 or above.
