Requirement Specification

REQ-0371 — Error Handling — Bluetooth Reconnection

1. Identification

Requirement ID	REQ-0371
Title	Error Handling — Bluetooth Reconnection
Type	Battery
Priority	High
Severity	Trivial
Status	Approved
Version	v2.5
Created	2023-05-06
Updated	2023-02-11
Source Document	SRS-APP-012-v2.pdf

2. Application & Solution

Application ID	APP-012
Application	SecureAuthentication
Domain	Security
App Version	4.5.1
Solution ID	SOL-018
Solution	Device Registry
Component	Cache
Feature	dark mode

3. Requirement Description

The system shall validate NFC tap-to-pay securely under stress-test conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Device Registry (SOL-018) being operational and at version 1.4 or above.
