Requirement Specification

REQ-0390 — Data Synchronization — Configuration Reload

1. Identification

Requirement ID	REQ-0390
Title	Data Synchronization — Configuration Reload
Type	Compatibility
Priority	Medium
Severity	Trivial
Status	Deprecated
Version	v2.3
Created	2023-02-19
Updated	2024-05-11
Source Document	SRS-APP-004-v5.pdf

2. Application & Solution

Application ID	APP-004
Application	DigitalWallet
Domain	FinTech
App Version	4.4.9
Solution ID	SOL-020
Solution	Playlist Manager
Component	Database
Feature	media streaming

3. Requirement Description

The system shall support search query execution reliably under standard conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Playlist Manager (SOL-020) being operational and at version 2.5 or above.
