Requirement Specification

REQ-0430 — Performance — Biometric Verification

1. Identification

Requirement ID	REQ-0430
Title	Performance — Biometric Verification
Type	Compatibility
Priority	Critical
Severity	Critical
Status	Approved
Version	v1.5
Created	2022-07-03
Updated	2023-07-06
Source Document	SRS-APP-007-v4.pdf

2. Application & Solution

Application ID	APP-007
Application	InternetBrowser
Domain	Web
App Version	6.3.5
Solution ID	SOL-014
Solution	Browser Engine
Component	Bluetooth Module
Feature	user authentication

3. Requirement Description

The system shall handle battery optimization securely under degraded-network conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Browser Engine (SOL-014) being operational and at version 5.1 or above.
