Requirement Specification

REQ-0433 — Reliability — Payment Processing

1. Identification

Requirement ID	REQ-0433
Title	Reliability — Payment Processing
Type	Reliability
Priority	Low
Severity	Major
Status	Approved
Version	v3.1
Created	2022-07-15
Updated	2023-03-30
Source Document	SRS-APP-003-v3.pdf

2. Application & Solution

Application ID	APP-003
Application	GalaxySearch
Domain	Search
App Version	5.0.0
Solution ID	SOL-001
Solution	Pairing Service
Component	Media Codec
Feature	accessibility support

3. Requirement Description

The system shall support haptic feedback without data loss under low-bandwidth conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Pairing Service (SOL-001) being operational and at version 3.1 or above.
