Requirement Specification

REQ-0460 — Recovery — Diagnostics Report Generation

1. Identification

Requirement ID	REQ-0460
Title	Recovery — Diagnostics Report Generation
Type	Connectivity
Priority	Critical
Severity	Minor
Status	Approved
Version	v1.2
Created	2023-02-21
Updated	2023-03-09
Source Document	SRS-APP-004-v4.pdf

2. Application & Solution

Application ID	APP-004
Application	DigitalWallet
Domain	FinTech
App Version	4.4.9
Solution ID	SOL-025
Solution	Security Vault
Component	Search Indexer
Feature	device pairing

3. Requirement Description

The system shall enforce NFC tap-to-pay consistently under stress-test conditions.

4. Acceptance Criteria

AC-1: The system shall satisfy the requirement within the defined performance SLA (p95 < 500ms).

AC-2: All failure scenarios must return a human-readable error message to the user.

AC-3: All events must be logged to the audit trail with a valid timestamp and user context.

AC-4: The feature must operate correctly in all supported environments (Mobile, Wearable, Cloud).

AC-5: Security constraints: all data in transit must be encrypted using TLS 1.3 or higher.

5. Dependencies

This requirement depends on the Security Vault (SOL-025) being operational and at version 5.2 or above.
