Test Plan

TS-0012 — APP-012 — Security Suite 12

1. Test Plan Overview

Suite ID	TS-0012
Suite Name	APP-012 — Security Suite 12
Suite Type	Integration
Priority	Critical
Status	Draft
Application	APP-012 — SecureAuthentication
Release	REL-003 — Release 4.3.0
Release Version	4.3.2
Release Date	2023-04-15
Created Date	2022-10-09

2. Scope & Objectives

This test plan covers integration testing for the SecureAuthentication application. Suite covering Configuration Service scenarios for APP-012.

3. Test Strategy

Testing will follow a risk-based approach with priority on Critical severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0504	Error Handling — Payment Processing	Recovery	High	Draft
REQ-0030	Battery — Payment Processing	Performance	Medium	Approved
REQ-0313	UI Behavior — Background Sync	Security	High	Deprecated
REQ-0232	Battery — Battery Optimization	Recovery	Low	Approved
REQ-0116	Performance — Audit Logging	Security	Critical	Approved

5. Test Cases Summary

TC-0171	Ensure that biometric verification does not exceed...	Reliability	Automated	High
TC-0335	Validate that media streaming returns the correct ...	Negative	Automated	Low
TC-0581	Validate that payment processing returns the corre...	System	Automated	Low
TC-0684	Ensure Bluetooth reconnection synchronizes correct...	Smoke	Manual	Critical
TC-1019	Validate that device pairing enforces access contr...	Smoke	Automated	Critical

SYNTHETIC DATA — No real Samsung confidential information

TC-1060	Validate that user authentication returns the corr...	Compatibility	Semi-Automated	High
TC-1179	Validate that Bluetooth reconnection returns the c...	Recovery	Automated	Critical
TC-1185	Ensure background sync synchronizes correctly acro...	Integration	Semi-Automated	Critical

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-029	Carlos Rossi	Test Lead	SmartHome QA
ENG-092	Aiden Quinn	Automation Engineer	Mobile QA
ENG-036	Wendy Davis	DevOps Engineer	SmartHome QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
