Test Plan

TS-0014 — APP-008 — Smoke Suite 14

1. Test Plan Overview

Suite ID	TS-0014
Suite Name	APP-008 — Smoke Suite 14
Suite Type	Smoke
Priority	Critical
Status	Draft
Application	APP-008 — VoiceAssistant
Release	REL-004 — Release 5.0.0
Release Version	5.0.9
Release Date	2023-05-30
Created Date	2022-09-17

2. Scope & Objectives

This test plan covers smoke testing for the VoiceAssistant application. Suite covering Push Service scenarios for APP-008.

3. Test Strategy

Testing will follow a risk-based approach with priority on Critical severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0484	Reliability — Multilingual Support	Performance	High	Approved
REQ-0215	Functional — Firmware Over-The-Air Update	Performance	High	Draft
REQ-0504	Error Handling — Payment Processing	Recovery	High	Draft
REQ-0050	Authentication — Firmware Over-The-Air Update	Security	High	Approved
REQ-0500	Functional — Device Pairing	Battery	Low	Approved

5. Test Cases Summary

TC-0031	Ensure that diagnostics report generation does not...	Smoke	Semi-Automated	Medium
TC-0075	Confirm that the system recovers gracefully after ...	Integration	Semi-Automated	Critical
TC-0109	Test that secure key rotation correctly handles in...	Security	Manual	High
TC-0160	Verify end-to-end flow of NFC tap-to-pay from logi...	End-to-End	Semi-Automated	Medium
TC-0440	Validate that user authentication returns the corr...	Functional	Automated	High

SYNTHETIC DATA — No real Samsung confidential information

TC-0518	Test that data synchronization correctly handles i...	Security	Semi-Automated	Critical
TC-0559	Ensure that search query execution does not exceed...	System	Manual	High
TC-0672	Ensure that biometric verification does not exceed...	Regression	Semi-Automated	Critical

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-073	Kevin Garcia	Test Architect	Automation QA
ENG-074	Clara Martinez	Performance Engineer	Release QA
ENG-083	Nina Vargas	Security Tester	Mobile QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
