Test Plan

TS-0018 — APP-012 — Integration Suite 18

1. Test Plan Overview

Suite ID	TS-0018
Suite Name	APP-012 — Integration Suite 18
Suite Type	Performance
Priority	High
Status	Archived
Application	APP-012 — SecureAuthentication
Release	REL-007 — Release 5.3.0
Release Version	5.3.3
Release Date	2023-10-12
Created Date	2023-01-15

2. Scope & Objectives

This test plan covers performance testing for the SecureAuthentication application. Suite covering Cache scenarios for APP-012.

3. Test Strategy

Testing will follow a risk-based approach with priority on High severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0378	Recovery — Session Token Refresh	Usability	Critical	Approved
REQ-0208	Performance — Device Pairing	Reliability	Medium	Approved
REQ-0409	Battery — Parental Controls	Error Handling	Low	Approved
REQ-0002	Functional — Media Streaming	UI Behavior	Critical	Deprecated
REQ-0342	Network Behavior — Media Streaming	Battery	Critical	Approved

5. Test Cases Summary

TC-0002	Verify that biometric verification fails gracefull...	Functional	Automated	Critical
TC-0005	Ensure that configuration reload does not exceed t...	Regression	Automated	Low
TC-0217	Verify that session token refresh fails gracefully...	Smoke	Semi-Automated	Critical
TC-0311	Validate that push notification delivery enforces ...	Regression	Semi-Automated	High
TC-0382	Verify that configuration reload completes success...	Security	Manual	Critical

SYNTHETIC DATA — No real Samsung confidential information

TC-0401	Ensure that device pairing does not exceed the CPU...	Reliability	Manual	High
TC-0490	Verify end-to-end flow of NFC tap-to-pay from logi...	System	Semi-Automated	Critical
TC-0508	Verify end-to-end flow of health metric upload fro...	Security	Semi-Automated	Critical

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-033	Xavier Evans	Automation Engineer	Security QA
ENG-018	Victor Ueda	Performance Engineer	XR QA
ENG-006	Oscar Harris	Senior QA Engineer	XR QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
