Test Plan

TS-0065 — APP-004 — Security Suite 65

1. Test Plan Overview

Suite ID	TS-0065
Suite Name	APP-004 — Security Suite 65
Suite Type	Smoke
Priority	High
Status	Active
Application	APP-004 — DigitalWallet
Release	REL-001 — Release 4.1.0
Release Version	4.1.3
Release Date	2023-01-15
Created Date	2022-11-27

2. Scope & Objectives

This test plan covers smoke testing for the DigitalWallet application. Suite covering Media Codec scenarios for APP-004.

3. Test Strategy

Testing will follow a risk-based approach with priority on High severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0029	UI Behavior — Biometric Verification	UI Behavior	High	Deprecated
REQ-0284	Connectivity — Offline Mode	Network Behavior	High	Approved
REQ-0299	Error Handling — Payment Processing	Security	Low	Approved
REQ-0300	Compatibility — Bluetooth Reconnection	Performance	Low	Approved
REQ-0197	Functional — Crash Reporting	UI Behavior	Low	Approved

5. Test Cases Summary

TC-0095	Verify that secure key rotation completes successf...	Sanity	Automated	Critical
TC-0145	Ensure that AR scene rendering does not exceed the...	Reliability	Semi-Automated	Low
TC-0178	Confirm that the system recovers gracefully after ...	Sanity	Manual	High
TC-0324	Validate that voice command recognition returns th...	Security	Automated	Critical
TC-0432	Ensure that device pairing does not exceed the CPU...	Recovery	Automated	Medium

SYNTHETIC DATA — No real Samsung confidential information

TC-0549	Confirm that the system recovers gracefully after ...	Functional	Manual	Medium
TC-0690	Confirm that the system recovers gracefully after ...	Compatibility	Automated	Critical
TC-1097	Confirm that the system recovers gracefully after ...	Reliability	Semi-Automated	Low

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-033	Xavier Evans	Automation Engineer	Security QA
ENG-093	Rachel Yamamoto	Automation Engineer	XR QA
ENG-094	Zach Anderson	Senior QA Engineer	Performance QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
