Test Plan

TS-0076 — APP-012 — Regression Suite 76

1. Test Plan Overview

Suite ID	TS-0076
Suite Name	APP-012 — Regression Suite 76
Suite Type	Full
Priority	Critical
Status	Draft
Application	APP-012 — SecureAuthentication
Release	REL-004 — Release 5.0.0
Release Version	5.0.9
Release Date	2023-05-30
Created Date	2022-10-15

2. Scope & Objectives

This test plan covers full testing for the SecureAuthentication application. Suite covering Push Service scenarios for APP-012.

3. Test Strategy

Testing will follow a risk-based approach with priority on Critical severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0385	Compatibility — Diagnostics Report Generation	Authentication	High	Approved
REQ-0238	Compatibility — Diagnostics Report Generation	Data Synchronization	Critical	Draft
REQ-0163	Network Behavior — Haptic Feedback	Network Behavior	Low	Approved
REQ-0232	Battery — Battery Optimization	Recovery	Low	Approved
REQ-0045	Network Behavior — Biometric Verification	Security	Medium	Approved

5. Test Cases Summary

TC-0096	Verify that Bluetooth reconnection fails gracefull...	Negative	Semi-Automated	Low
TC-0216	Ensure that data synchronization does not exceed t...	Sanity	Semi-Automated	Critical
TC-0220	Verify end-to-end flow of firmware over-the-air up...	Integration	Semi-Automated	High
TC-0305	Validate that background sync returns the correct ...	Smoke	Automated	High

SYNTHETIC DATA — No real Samsung confidential information

TC-0349	Verify that Bluetooth reconnection fails gracefull...	Recovery	Semi-Automated	Critical
TC-0356	Ensure session token refresh synchronizes correctl...	Security	Automated	High
TC-0489	Validate that user authentication returns the corr...	Functional	Automated	High
TC-0532	Validate that AR scene rendering returns the corre...	Smoke	Semi-Automated	High

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-015	Clara Singh	Automation Engineer	SmartHome QA
ENG-033	Xavier Evans	Automation Engineer	Security QA
ENG-069	Aiden Martinez	Security Tester	Release QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
