Test Plan

TS-0095 — APP-004 — Regression Suite 95

1. Test Plan Overview

Suite ID	TS-0095
Suite Name	APP-004 — Regression Suite 95
Suite Type	Smoke
Priority	Low
Status	Archived
Application	APP-004 — DigitalWallet
Release	REL-003 — Release 4.3.0
Release Version	4.3.2
Release Date	2023-04-15
Created Date	2023-02-14

2. Scope & Objectives

This test plan covers smoke testing for the DigitalWallet application. Suite covering Database scenarios for APP-004.

3. Test Strategy

Testing will follow a risk-based approach with priority on Low severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0076	Recovery — Bluetooth Reconnection	UI Behavior	Medium	Approved
REQ-0156	UI Behavior — Remote Diagnostics	Recovery	High	Deprecated
REQ-0366	Compatibility — Payment Processing	Error Handling	Critical	Deprecated
REQ-0027	Performance — Battery Optimization	Data Synchronization	High	Approved
REQ-0109	Authentication — Haptic Feedback	Performance	Low	Deprecated

5. Test Cases Summary

TC-0063	Validate that session token refresh enforces acces...	Sanity	Manual	Medium
TC-0119	Validate that push notification delivery returns t...	End-to-End	Semi-Automated	Critical
TC-0157	Ensure device pairing synchronizes correctly acros...	Recovery	Manual	Critical
TC-0266	Ensure that data synchronization does not exceed t...	System	Automated	High
TC-0523	Verify that health metric upload fails gracefully ...	Reliability	Semi-Automated	Low

SYNTHETIC DATA — No real Samsung confidential information

TC-0526	Confirm that secure key rotation triggers the expe...	Recovery	Semi-Automated	Medium
TC-0578	Validate that biometric verification enforces acce...	Sanity	Manual	Low
TC-0635	Confirm that push notification delivery triggers t...	Functional	Semi-Automated	Low

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-021	David Lee	Senior QA Engineer	Platform QA
ENG-053	Julia Harris	Automation Engineer	Security QA
ENG-034	Nina Anderson	Test Lead	Automation QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
