Test Plan

TS-0098 — APP-010 — Integration Suite 98

1. Test Plan Overview

Suite ID	TS-0098
Suite Name	APP-010 — Integration Suite 98
Suite Type	Integration
Priority	Low
Status	Active
Application	APP-010 — MediaPlatform
Release	REL-001 — Release 4.1.0
Release Version	4.1.3
Release Date	2023-01-15
Created Date	2023-10-20

2. Scope & Objectives

This test plan covers integration testing for the MediaPlatform application. Suite covering Push Service scenarios for APP-010.

3. Test Strategy

Testing will follow a risk-based approach with priority on Low severity scenarios. Automated test cases will be executed first to detect regressions early, followed by manual exploratory testing for edge cases. Performance and security test cases will run in parallel in dedicated environments.

4. Requirements Under Test

REQ-0261	Authentication — Device Pairing	Error Handling	Low	Approved
REQ-0068	Battery — Secure Key Rotation	Data Synchronization	Critical	Deprecated
REQ-0464	Error Handling — Media Streaming	Authentication	Medium	Approved
REQ-0290	UI Behavior — Configuration Reload	Usability	Medium	Approved
REQ-0453	Compatibility — Remote Diagnostics	Functional	Critical	Approved

5. Test Cases Summary

TC-0047	Verify that device pairing fails gracefully with a...	Regression	Semi-Automated	Low
TC-0062	Validate that payment processing enforces access c...	Reliability	Semi-Automated	Medium
TC-0285	Confirm that AR scene rendering triggers the expec...	Regression	Manual	High
TC-0491	Confirm that configuration reload triggers the exp...	Functional	Manual	Medium

SYNTHETIC DATA — No real Samsung confidential information

TC-0605	Verify that search query execution completes succe...	Security	Automated	High
TC-0702	Verify that NFC tap-to-pay fails gracefully with a...	Negative	Semi-Automated	High
TC-0758	Validate that playlist shuffle returns the correct...	Security	Automated	Critical
TC-0856	Confirm that push notification delivery triggers t...	Compatibility	Manual	High

6. Test Environments

Primary	Mobile Lab — Android 14 — WiFi-6 (ENV-001)
Secondary	Staging — Android 13 — LTE (ENV-007)
Extended	Low Network Env — Android 14 — Low-BW Sim (ENV-009)
Performance	High Load Env — Ubuntu 22.04 — Ethernet (ENV-010)

7. Entry & Exit Criteria

Entry — Build	Smoke suite must pass 100% before full regression begins.
Entry — Env	All required environments must be Available status.
Entry — Defects	No Critical-severity open defects from the previous cycle.
Exit — Pass Rate	Overall pass rate >= 95%.
Exit — Critical	Zero open Critical-severity defects.
Exit — Coverage	All Priority=High test cases executed.

8. Risks

Network instability in low-BW env	Medium	Reserve stable WiFi fallback
Device unavailability	Low	Reserve backup devices 48h ahead
Build quality regression	Medium	Execute smoke before full regression
Flaky automation scripts	Low	Quarantine flaky TCs, re-run 3x

9. Responsible Engineers

ENG-021	David Lee	Senior QA Engineer	Platform QA
ENG-058	Ben Davis	Test Architect	Security QA
ENG-047	Wendy Johnson	Test Lead	Platform QA

10. Synthetic Data Notice

This document is entirely synthetic and intended for AI/RAG research only.
